

Hello gamer

Welcome to this walkthrough (1.04) of Himeros Hotel – Part 1 of the Himeros Trilogy.

I will bold words you need to write.

Recommended setup below. You can zoom the map to make sure you can see every room.

Lets get started. This is a somewhat optimal path and it might miss some optional stuff. This is played as I would as I remember it and I am sure there is faster way if I look into the code and count timestamps ☺

Things in parentheses are shortcuts. Commas just separate different commands and are not typed.

Days are not important. If you somehow get out of sync with the events in a day just wait a day and do the same steps again. **If you are stuck please check the display with the command "cd" to see if you have anything you need to do to continue. The day count is not important and you can't fail the game. Just try to clear the current objective in your display and repeat the day where you are stuck in the walkthrough.**

**Text in blue are corrections in newer version of this text. If you are stuck around that day please consult.**

**Text in red is the newest fixes for version 4 and Himeros Hotel v. 1.03b+.**

You start in the Lobby and are told to look around and ask someone about the job.

Type **west (w)**

### Optional **look** and **look at receptionist**

Will not write "type" anymore from here on.

If you are stuck during any steps the first step should be to check your display. Shortcut "cd". Can be slightly slow as it checks for every task in the game.
