## Flashy Blues Shuffle in G

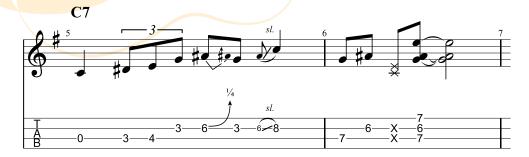

Tenthumbspro.com For educational purposes only

Key: G
Chords needed: G7, C7, D7
Video Tutorial: <u>https://www.youtube.com/watch?v=FaInGC1zOhs</u>
Chord Shapes:

The G Shuffle - This is the foundation of the whole 12 bar, take the time to get this correct. The hammer on from the 6 to the 7 is the flat the  $3^{rd}$  to the  $3^{rd}$  and this sound is VERY bluesy. I will put some fun alternative ideas at the end

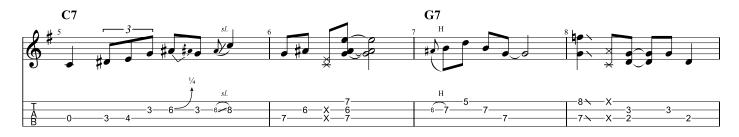

C7 Shuffle – This one is great too, it adds a triplet with the minor major  $3^{rd}$  vibe to and then it rolls into a C7 up the fretboard.

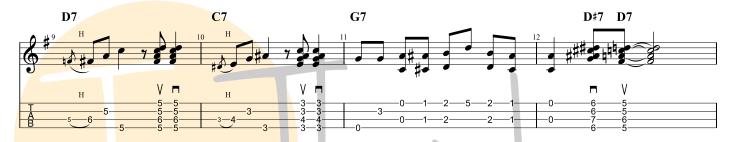

The turnaround - This one comes from the 5 turnarounds in G we did the other day, it is a Piedmont turnaround

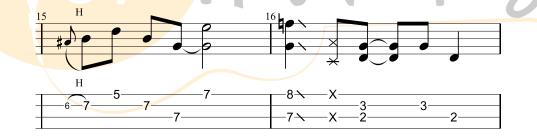

Fun alternatives for the G shuffle - This one ends on the 6<sup>th</sup> interval instead of the root to give it more of the shuffle feel.

Another alternative - This one goes to the  $6^{th}$ , root and back to the  $5^{th}$  for a really old school shuffle feel.
