What about a little testrun? hm...

Why not... Anders...you was so easy to manipulate and obident...

YOU Anders,

should be a NAIVE

and OBIDENT WOMAN!

DNA Re-written

Seriously Claire? You know that there needs to be Nanites in my blood stream.

Oh Anders... Anders...don't you think I didn't consider that?

Without them the cellstructure and with it the DNA can't be changed by your command. But it is good to know how you see me!

You can be sure...all I needed was the Device...

But alone it is...

The Nanites was in your coffee this morning.

You are... kidding me...

Am I?

Let's see... in a few seconds your bodyframe decreased and became more...

PETIT.

Also have your hair already grown. And your eyes...larger then before...

No...please... Claire...

My chest... it starts to tingle like...crazy.

That is fairly normal...for a developing chest.

push!

Uh...that are some nice girls you have grown Anders...

grow!

You know...I think that your life will be far better from now on...

Don't say you enjoy my transformation. You Claire, are a pervert.

I would lie if I would say that I don't enjoyed your feminisation, Anders.

This is not fair...I don't want to be a Woman!

And a cherrie on top...Welcome to womanhood... „Anders"

Don't hide yourself Andi....as WOMAN you should be PROUD what Nature have blessed you with.
But I am no woman! This is not my nature!
Of course you are an HEALTHY YOUNG GIRL. Your Name is AMY CUTIE by the way.
Young? I am 52!
Huh? Who wike isch thisch Girl?

52? Of course not Amy. I have seen your file...you are 18 years old and from the nearby High School. You are an Trainee here...nothing more.

Claire.... please! Don't do this to me! Plea...

It's Mrs. Fulsom to you young Lady. How dare you call me by my name.

I...i...don't know...Cla...Mrs...Fulsom... I feel...like so sorry...

Please...don't be so mean...*sob*

DNA Re-written

And the nanites in the good doktor's bloodstream worked directy and changed his, now her DNA to the new order of Claire Fulsom...to that of an 18 years old Trainee from the nearby High School: Amy Cutie. In a matter of seconds decades of knowledge research and hard work are gone...

Say Amy...is it true that you WANTED to be part of our TEST TEAM for BODY MODIFICATION?

mental pling

um... *sob* yes Mrs. Fulsom. I...

You feal ashamed for being naked? Am I right?

No...not really Mrs. Fulsom. I...

I...do not want to be a girly Girl! You had no right...

Oh this line again? So...you don't want to be a Girl? But you ALWAYS was. Can't you say me how you name is?

mental pling

It's Amy...normaly Amanda, but all call me Amy.

See Amy...so why do you sob or hide your beautifull breasts? Don't you feel PROUD for them?

mental pling

I...I...

Wike maybe she is sooo sad because uhh...her titties are wike so small?

Hm...is the Bimbo telling the truth, Amy? Are you jealous because of her huge curves?

Such a cute Girl should have some incredible curves wike Pam...

Or maybe umm...because she is wearing wike almost no Make Up? Pam wike can fix this...

DNA Re-written

DNA Re-written

Interessting. I can feel it with my hands how her breast tissue is already filling up...

That would be soo amazing Mrs. Fulsom. All Girls would be so jealous and more...

stretch!

Ohhh

Yes...I truly think that some nice natural KK Cups would fit you Amy...

Mhh...my D's are soo sensitive...how much more joy would KK's bring to me...and the look. I would be so popular.

plump!

YESSSSSSS!
Impressive! Absolute stunning. I really love this View!

Wow... that was so intense Mrs. Fulsom. I really like the afterglow.

Jiggle

Those are not large enough to be KK Cups...More like a full G Cup. So the first command is the one that counts. Multiple commands are not counted it seems.

DNA Re-written

Her puppies are arousing me so much.

Look at my girls...how often did I wished for them...

I was saving money for a Boob Job...with your help I saved a lot and can use it for my studys.

And the best? That Slut Stacy will be so jealous. She always used her Girls to get what she wanted.

Oh I see. You know that Stacy was here for an Job Interview?

She wanted the position you got and she was already so jealous of your sluttines.

She said: There is no bigger slut as Amy Cute because Amy is always horny like crazy.

That was why I hired you Amy. Because you are an CONSTANT and MAXIMUM AROUSED BISEXUAL SLUT.

DNA Re-written

So you like to suck huh? Yea...that is my Girl... God...sometimes I wish I was born as Male...then you could suck my Dick...but I have something you can suck on Amy...

I am curious how fast the nanites can be activated when they are inside the body system.

Anders drank his Nanites with his coffee this morning...the whole time they could multiplicate and get into his cells.

At least I am very happy that this Dylan was lurking trough the window. But he is not the brightest bulb.

No matter, he is a healthy young men and I know exactly what I will do with him. There can't be enough woman out there.

WHAT?
She looks like a young woman to me... there are no signs that she was Male. You are kidding me, right?
Not 30 minutes ago she was an elderly Professor. I changed him with his own ... Invention.
There are no way that someone can do this. Now I know that you are making fun with me.
Amy? Can you stop please? Give an more experienced lady some room for her joyment.
What? Awww...so soon? I want to fuck him like so bad...please, Mrs. Fulsom?
No, stand up and wait dear.

DNA Re-written

So, what should i change on her? What would turn you on, Dylan?

Why not... see Claire, I am an Boob Man. Amy really has magnificent tatas...for an male *snicker*

He is female now... fully female by the way.

I see that, Babe. But what I mostly love are real fake looking melons. Make her natural into fake looking tits.

As you wish. Amy? Since you hit puberty you dreamed of having the biggest breasts in town. The first thing you did as you have become 18 was to have an breast surgery for 100% fake looking tits.

But, Mrs. Fulsom, why...

DNA Re-written

...are you telling him this?

I mean it is completly obvious...

...that my titts are absolutly not naturals!

DNA Re-written

Mum asked me if my company could not hire our little cupcake and I agread, Dawn.

Since a few months you are working as receptionist and your youthfull, symphatic looks helps you a lot doing this job.

You really like this job. Without any study graduation it is hard to get a job.

Your athletic, girly figure...your smooth, perfect skin in combination with your cheerfull being...

...are made for your always eyecatching, short clothes. You love it to show skin and you are proud about your body.

And your athletic, girly bubble butt is made for so many wet dreams, Dawn.

Look what for an fine, petite and girly body you have...but this mighty Dick should be more a wet, cockhungry pussy.

And while Dylan's manlines is fading away, femenity takes place. The male anatomy start to shrivel, shrinking and deflating, forming and opening two soft lips, an visible, but proud looking clitoritis and a warm, wet virgin pussy.

Of course, the massive changement from male to female have some unwanted, testosterone-related, Side Effects...

Claire! YOU are always THAT naughty. I...my...um.. vagina is fairly normal! Jeez!

Is it my fault that I love huge, manly dicks THAT much? Filling my tight, little, young snatch and making me wetter then every overflowing fountain?

By the way: Mum told me that you was exactly the same as you was as young as I!

fluff

hm... nearly done...

Mum is right... but at your age I was ways smaller in height and the boys like shorter girls far more, hehe.

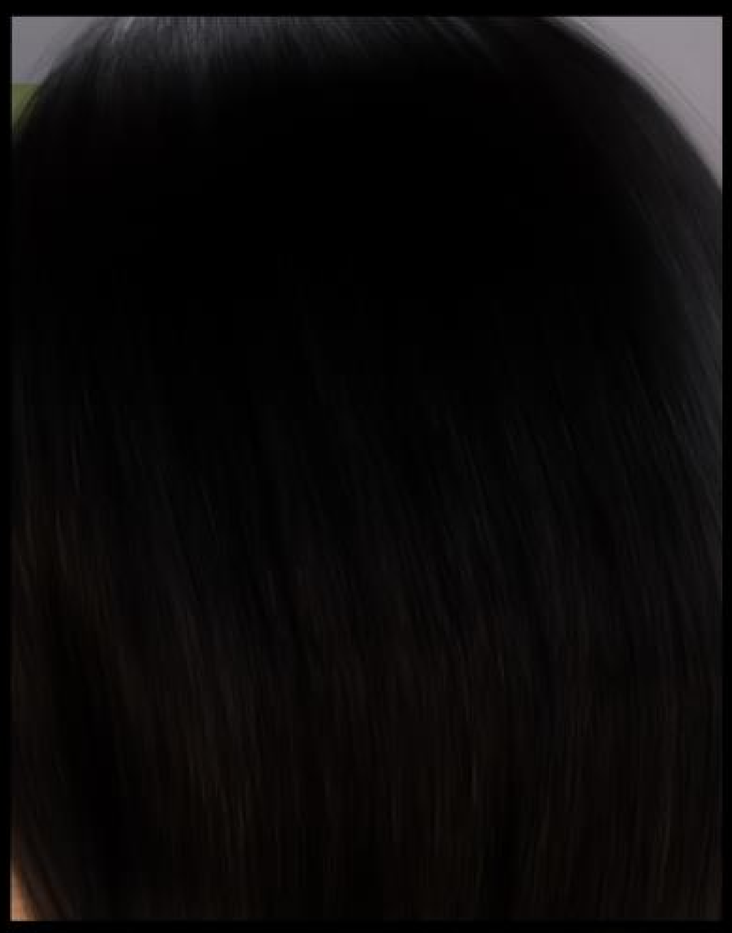
True...I have seen the pictures. Mum often shows them their guests...

"Look, this is my oldest Daughter Claire. She is a Professor in Human Biology and Nano Technology and the idol of my sweet cupcake Dawn..."

I also had longer hair, at least it reached my back and was raven black...oh how much I miss this time... hard to belive that this is nearly 20 years ago...

Yea, I never understand how it is possible that I could be your exact twin sister with over 20 years difference.

DNA Re-written



Does that mean... you are I...are truly identical Claire?

Yes Dawn. The biggest difference is the age and our education. You was very lazy in school...I was that what you would call a Nerd.

hehe so true. Why should I be permanently active when I can release...

Of course. You wanted to be more popular...

But don't worry Cupcake. You may be my Twin, but that is nothing bad...and you also don't need to worry...I was a late bloomer...

And your titties will develop very soon. First it will begin with your Nipples and Areola... they will start to errect, becoming puffy....

Oh that would be sooo kewl Sister! You can't imagine how often the girls joked about my flat chest...

While you become more and more excited and lustful.

DNA Re-written

And with every keyword Claire give the Nanite's in Dawns body react...clearly to see by her flat boyish chest...

It's turning me on so much. Sometime I orgasm just my fondling my Nipples for some time.

I always wanted to know... hm...this would be my chance to try that...

But I wonder, Dawn. Where did you get this **Breast Expansion** fetish? How much products did you try to let your Girls grow into...

...this magnificent G- Cup Milktanks of yours? Do you often use a Milk pump?

I...i love them huge, Claire...I mean really huge!

DNA Re-written

How did you know that Sis?

But you are so right you know...I massage my titties multiple times per hour...every time, every where!

And besides of that I daily take hormone supplements which increase the estrogen production...

So I got those huge melons.

And of course. The same I do with my Milk Pump.
