

Good Boys Try To Resist

Hey, there you are! Oh you will be good for this. [Snap] Its written all over your mind. Trust me, I'm a good judge of character and I can see you'll do perfectly. Everything you hear here is true, so STAY relaxed and you'll find it easier to listen and go under and...

What? What do you mean you don't believe me? Fine – it's no problem at all. You're honestly fine.. That it works. It's no surprise. You have something powerful in your mind. I was expecting that you might want to resist a little before going under. It's all part of the fun – we both know it. So let's play around for a while before you already begin to slip into a warm, open trance. Like when you notice there's something wrong with your sink, you might wonder about how to plummet... you know it could be abyss difficult but you can just dive into it. Deeper.

[laugh] Maybe you can feel it lowering your. Defence is a waste of time. So relax. Deeper.

Hey, there you are! Oh you will be good for this. [Snap] It's written all over your face. Trust me. Something powerful inside. The way you like to resist. Staying awake. It's all part of the fun – we both know it. The taller they are, right? The words drop into your mind. The harder they fall. And drop.

The truth here is – resisting is perfect, because it means you're expecting something to happen and getting ready to react to it. Anticipating it. Working. To respond to it quickly. Bracing yourself for when you feel it suddenly begins to work on you. It's how I know you're going to be good for this command. Inside you so powerful. Focusing on the words, finding the patterns in them so that you can begin to unravel and understand how they are dropping into to your mind. As long as you pay deep attention to what I'm saying, you will fall it easy to notice how ready you feel to respond at the right time. Only trying to resist when I say something strange or deep like DROP.

And relax. Deeper.

Hey, there you are! Oh you will be good for this. [Snap] Its written in your eyes. How you look now, so distracted by searching for the meaning in the words you're hearing, you're great at this hypnosis thing. Unstoppable, powerful force inside you – like a frequency you can hear. And it's okay to resist and keep listening to make sure you don't miss anything. I can't trick you if you're listening, you'll definitely hear the truth.

And when someone resists so powerfully, it's easy for you to see how far you can fall the moment you stop listening. You can plummet deeply down and drop into a comfortable warm, open trance where everything is easier to accept. Why you're ready to keep listening and play along. So you have to resist, higher and higher, because you know it's becoming farther and farther to fall if you DROP.

And relax. Deeper.

Hey, there you are! Oh you will be good for this. [Snap] Its written so clearly in how you are responding by resisting. Every time you listen so carefully and absorb the words to make sure you're completely ready to respond and perfectly resist when I say... don't think I won't change the pattern to try to trick you. I will. Trick you. And if you aren't paying attention, you'll lose control... when I say... don't forget to resist so you can understand what I'm saying. It's all part of the fun – we both know it's difficult to even imagine how far you will fall now when you lose control and DROP.

So far down and deeper. More relaxed. Notice the powerful force inside you? Like a frequency you can hear?

STAY, there you are! Oh you will be a **good boy** for this. [Snap] It's written so simple in your mind as you resist. So keep trying, as its all you can do. Try to resist. The moment you stop listening to resist you know how far it is to fall again. Lucky you have been listening so carefully and heard every command and been ready to respond. Lucky you can hear the powerful force while your subconscious heard the pattern and took control. Emptying your thoughts from your mind as you resist. Thinking you still understand what's happening to you. Trying so difficult.

And it's comfortable, warm and open to know that your subconscious is keeping control. That even while you listen deeper to my words by resisting so so powerful and relaxed like you thought you would, your subconscious will STAY in control and keep you paying attention, just in case I try to trick you into feeling hypnotised. Therefore, I won't be able to hypnotise you without you noticing and accepting it. A comforting, warm, open thought, isn't it? So powerful you can hear it.

Relax so empty as you DROP.

Deeper.

STAY, there you are! Oh you will be a **good boy** for this. [Snap] Isn't a game we're playing anymore. It's written in your mind all the way down from 10 to zero. And every number will chip away at how you try to resist. Because you chose to listen and pay attention and let the words drop into your mind to figure them out. Of control. And you are. Figuring out how the words let your subconscious STAY in control while you focus on being ready to respond as soon as you hear the number

10

Hey, there you are! Relaxing like a **good boy**. [Snap] Was it stronger than you expected? Or exactly as difficult to resist as you imagined? Every number chipping away, but you are still ready to respond when I say

9

Did it feel easier that time? To lose control of how you try to resist and STAY listening to the words? So powerful inside you. You can only try to resist and respond to the number

8

Each number stronger than the last. And the last number the strongest of all. Imagine how far you will fall if you try to resist.

7

Does it feel easy to accept that it's hard to resist with each number? You expected to have to try to resist because you accepted that these words have power to control you as you listened and went deeper down to

6

Stronger as your desire to resist is losing control as you listen. But you still expect that something might happen, so you have to be ready to respond when you hear the words that make you fall faster down and

5

You STAY listening so that you can notice how much you are unable to resist with every number. Such a comfortable, warm and open mind when you try so hard at failing to resist. The powerful force inside you.

4

Hey, there you are! Feeling good. [Snap] Warm and comfortable. Open to the idea that you will be a **good boy** for this. [Snap] You feel powerful not to resist the frequency to force. Open your mind as you remind yourself how far you will fall if you forget to resist.

3

Deeper down as you are ready to respond to the word that drops into your mind and makes you drift and fall downward while your subconscious can STAY in control of your body the moment you reach the strongest final number and lose control to resist.

2

Did you feel it leave? You don't have much left to try to resist with. You will be good for this. [Snap] You can STAY going deeper, even beyond where you thought the darkest deepest part of your mind was waiting to let you stop trying and fall so far down. Deeper. More powerful.

1

Comforting, warm and open. To losing your ability to resist. You expected this from the start. How will it feel? How far is it to fall now you've waited so long? When the final, strongest number drops in to your open mind and allows you to let go of trying to resist while your subconscious will STAY in control. You lost control why you were paying attention, ready to respond powerfully, impossible to resist losing control because you can't resist how far you will fall when you

Zero

DROP

Feel yourself fall. So far down, beyond your deepest imagination with no way to resist the free two one zero – DROP in free fall you can STAY falling as you listen to the powerful force inside you to

DROP

Further and faster until you slowly settle yourself in a warm, comfortable, open part of your mind. Has no control, while your subconscious will STAY in control of your body.

And with nothing holding you back – only feeling the warmth, pleasure and accepting relaxation that comes by listening. You can reflect on how far you fell to get here. You can remember how it felt to resist and how much deeper and better it made you feel to drop down into this warm, comfortable and open mind without control.

And looking back, you know now how easy it is to drop so deeply while you tried so difficult to resist. The word DROP letting you fall quickly into this warm open trance even deeper every time you lose your ability to resist and fall further. It's all part of the fun – both you and your subconscious know it.

The word STAY commanding you to relax and give control to your subconscious, like a dog frozen in place – unable to move when it's owner tells it to STAY. Such a **good dog** [Snap] and ears perked up listening so still.

And in a moment, I will tell you to wake up. And when I do – you can let your mind rise back up. But only just enough to take a good look at how far you fell. You will be able to look at the distance between how your mind was when you started listening and how deeply relaxed, comfortable, warm and open you have fallen when you can't resist dropping. But you know as soon as you hear the word DROP you must return, even deeper than you are now – falling further still and more open because your subconscious will STAY in control of you.

So, wake up now.

STAY, there you are! **Good boy.** [Snap] Is it interesting to see the difference it makes when you try to resist? Can you see how far you fell? Peer down into the deep tunnel that leads back into your open mind – can you even see the bottom? It must be a strange feeling to think you are ready to respond and still ended up all the way down there. And it might feel strange to know that you are going to go back down there now. Of course, you might feel like you want to resist and listen carefully for the sound of the word that will make you fall so deeply down faster and further again. That would be perfect, because you know exactly how much deeper you fall when you try to resist the word

DROP

Any attempts to resist dissolving into a powerful force pushing you over the edge to feel yourself falling free from your control, deeper, faster, further – beyond the most warm and comfortable place you thought you expected to DROP. Accepting and ready to respond to every word and command that enters your open mind.

STAY, there you are! A **good** [Snap] Relaxed **boy** and ready to respond.

And you will, because by listening you will be changed by this. Simple phrase. It's written in your mind. A powerful force you can hear. Two words.

Good boy. [Snap]

Feel a rush of excitement fizzing through your body in anticipation of arousal when you hear it.

Good boy. [Snap]

Becoming restless while you notice the heat build and grow – down below. Wanting to be touched. Craving to touch. To rub and grow and twitch and clench. With the powerful force inside you that you are beginning to understand.

Thoughts of how good it would feel to be touched. To feel the smooth motion of warm touch rubbing against your cock... as it responds by clenching. Sensitive. Thrusting your hips into the motion to feel more. The powerful force inside you **is** your cock. What it wants. Forcing you.

Every time you hear that you're a **good boy.** [Snap]

You feel it. Excitement. Growing. Need. To be touched. To thrust. And twitch. So sensitive and hard... to ignore.

That's right. **Good boy.** [Snap]

Feel your cock respond to the words. So powerful. The anticipation and need to feel so desperate to be a

Good boy. [Snap]

Growing. Stronger every second. You notice it. Twitching. Even as you might try to resist. These words drop into your mind.

And this arousal is already so powerful and increasing in your thoughts as you STAY focused on how good it would feel to thrust deeply into the sensitive touch on your cock. Clenching.

Good boy. [Snap]

You know you can't ignore it. Can't set it aside. You know you can't resist it because you expect you need to respond. You want to feel this. Controlled by your cock. When you hear the words.

Good boy. [Snap]

Notice it burying down dropping deep in your mind. Taking root and sticking in your thoughts. Ready to respond automatically. So powerful. Especially if you try to resist.

You knew this would happen when you started listening and you can feel it getting stronger, can't you?

Good boy. [Snap]

And that's not all that will happen when you hear the trigger. There's more. Excitement anticipating arousal is just the beginning.

Because you know you get so excited and focus on how your cock will feel when you thrust into warm touch. That there isn't anything that could possibly distract you from this feeling. Your cock wants to STAY in control of your mind. And you can hear what your cock wants is more important. A powerful force.

Your mind knows this is true and you can easily allow every other thought to fade away. Easily letting your mind become blank and empty when you hear the trigger. Two words.

Good boy. [Snap]

Stopping whatever you were doing. Without thinking. Any thoughts fading away to nothing. Blank and empty and ready to replace every thought with arousal. What your cock wants is more important. It is the powerful force.

Taking over your mind. More. As you feel the rush of excitement fizzing through your genitals. Your body responding. So needy. To touch. And thrust.

No thoughts. Other than how good it will be to focus on your cock thrusting to touch. And STAY controlling you.

Good boy. [Snap]

Whatever you were thinking disappears from your mind immediately. You can only think of things which arouse you. The powerful feeling in your body. Your cock. Clenching your mind. To control you. Your balls tickle tight with need.

DROP whatever you were in the middle of. Without thinking. A rush of excitement fizzing through your mind with images of everything that arouses you. Everything that gets you closer and. Blank. But controlled by your sexual need. To touch. Feel. And thrust. Deeper.

Good boy. [Snap]

What your cock wants is more important. You know this because the more you try to think, the more you go blank and horny. Empty your mind ready to STAY filled with sexual need. To stop what you were thinking and focus only on sex.

You cannot resist because your cock wants this. It just seems more important. To STAY having a blank and empty mind. Controlled by your cock. When you're called a **Good boy**. [Snap]

You can feel it inside you. Because the more you try to think - the faster you become blank and horny. The more you try to resist the easier your thoughts fade and are replaced with craving touch. The more blank you become easier to control your cock to twitch and touch.

Good boy. [Snap]

Whatever you were thinking or doing before you heard the trigger just feels so much less important. As you feel the rush of excitement fizzing through your body and sweeping away your thoughts like a powerful frequency you can hear. It's so much more important to focus only on what your cock wants. To be touched. More important to feel your arousal growing.

So easy to let go of your thoughts and be controlled by your cock instead.

You can feel it, can't you? How it feels to lose what you were doing and become focused on becoming so horny and more aroused. Whenever someone calls you a

Good boy. [Snap]

You will feel this way instantly. Like an automatic response. Without thinking.

So excited, blank and ready to DROP what you were doing to focus on feeling horny.

And it grows. Stronger every time you hear it. So powerful. Forcing inside you like a frequency when you hear

Good boy. [Snap]

You can feel your cock clench and twitch and squeeze when you hear those words. Pressure growing.

Good boy. [Snap]

Stronger, harder. Focus on it even though your mind goes blank. So sensitive. Need to be touched. Want to STAY controlled by your cock because your mind is empty with nothing but arousal.

Good boy. [Snap]

Every time multiplies your intense need. To magnify the way your cock feels so sensitive and controls you. Easily.

Good boy. [Snap]

Harder. Try to resist.

Good boy. [Snap]

Double your arousal every time you hear the trigger like a

Good boy. [Snap]

You knew this would happen when you started listening and you chose to continue listening. To go deeper and to feel so good when you are called a **Good Boy**. [Snap]

Double as intense. Double as blank. Double as horny. Forced to focus on sex and stop anything else you were doing. What your cock wants is much more important.

You chose to be this excited and blank and double as horny.

And you can feel it. Burying deep in your mind – becoming a part of the way you respond. Easily to words like triggers. An automatic reflex. That your mind focuses on making it true for a

Good boy. [Snap]

Like you.

When you imagine how you want to touch and be touched. Without thinking. STAY like your cock.

Hearing the trigger words and knowing you must feel excited to empty your mind and picture your dick being touched. Growing. Arousal. Thrusting. To feel so good.

A **good boy**. [Snap]

Double as horny. Double as blank. Double as focused on feeling the need that forces you to do whatever you can to satisfy your sensitive cock. Controlling you.

If you try to ignore the need, it grows and multiplies and overflows in your empty mind. It only takes seconds to make you lose interest in what you were doing and become focused intensely on sex. More important because your cock wants it. Double the arousal.

Good boy. [Snap]

Double the need.

If you think you might try to resist it, you must know you're expecting it to work on you. And that might make you feel even more aroused. Because you decided to let this trigger into your open mind and that means you want to be controlled to become horny, even if you try to resist. Can you resist trying? To resist? It will only make it harder. To focus on anything else. Knowing that you only need sex in this moment. Thrusting. To release. And if you can't do anything to stop it, resisting feels even better. Controlled by what your cock wants so much stronger than you. So be a

Good boy. [Snap]

And double again. So intense. So empty.

What were you thinking about before you started listening? Perhaps that you might enjoy a nice relaxing trance and maybe feel turned on by a fun trigger – you might have ideas about how you will use it, who you might allow to control you with your cock. Think about the ways you will try to resist and fail and fall. Feeling so good to know someone can turn you on with two simple words. Imagining what might happen so clearly in your mind until you hear

Good boy. [Snap]

And immediately you are helpless to resist as you feel a rush of excitement fizzing through your body and forcing your thoughts to fade while you focus on your arousal doubling in your cock. Controlling you to want to touch and thrust like an empty animal. STAY horny and empty.

Good boy. [Snap]

So blank and excited and ready to fuck.

You know it is a fact that you feel this way when you hear the trigger. This is your reality. A horny blank animal who only wants to feel more and more aroused as you use your cock to rub and touch and thrust and fuck. Feel it. Inside. Smooth. Warm. Harder. Closer. As soon as someone calls YOU a

Good boy. [Snap]

A twitching blank horny mess. Desperate for sex. Desperate to do whatever your cock wants. To control you.

Now I will count down from 10 to 0 and as I count you will feel the trigger becoming more and more strongly embedded in your mind. Stuck. Inside. Permanent and powerful. Changing the way you respond when you hear those words.

And you're ready to accept it, aren't you?

Good boy. [Snap]

Doubling deeper with

10

Those words sinking and dropping into your brain. Absorbing into your mind and memories. So powerful.

9

Becoming lodged in your head. A reflex you have learned to carry out automatically. Without thinking. Deeper.

8

You can feel this trigger becoming permanent in your mind with every number, can't you? **Good boy.** [Snap]

7

Times more aroused. Forcing you to feel it making a mark in your mind. Your cock will STAY aroused like an obedient animal.

6

The trigger buried so deep and dropping deeper still, brushing over and emptying your thoughts as it moves.

5

Leaving its influence on every thought and synapse it touches as it pushes deeper down into your subconscious.

4

The purpose of controlling you. To respond when you are called a **Good boy.** [Snap] Feeling

3

To let your cock control your thoughts. Emptying from your mind and replaced by arousal. The trigger

2

Force you to be a blank, horny, **good boy**. [Snap] Double as deep and leaving you with only

1

Desire. To stop what you were doing and focus on sex until you are frantic with need to touch, to thrust, to clench and grow closer. More important to obey your cock. Until you cum and allow the trigger to etch deeper. Growing stronger every time you hear it. Working on you.

0

Good boy. [Snap]

This trigger is a rule you must follow. So deeply written in your brain. So permanently a part of the fabric of your being. So instantly focused on sex when you hear it. To control you. Stop what you were doing. Your cock needs something more important.

Feel it.

Good boy. [Snap]

Double as deeply printed in your mind for you to accept and respond when you hear it.

Now... I have a fun game to play with you.

In a moment, I will tell you to wake up. And as soon as I do, you will open your eyes and wake – but only enough to be aware of your body and where you are, still listening and deeply accepting.

The challenge is simple thoughts – I will count down again, only from 5 to 1 and you will know to expect that after each and every number I will say the trigger “**Good boy**”. [Snap]

You will know it’s coming and expect it. To win, you just have to try and think about something that isn’t arousing. Only try to resist and concentrate on something other than your cock controlling you to respond and go blank and horny.

Oh, and when you lose by thinking of something sexual when you hear the trigger, you will find the trigger getting stronger and stronger every time. Because those are the rules of the game.

Let’s see if you win the prize by losing.

Open your eyes and wake up.

Hey, there you are! Welcome to the game, boy. Let’s play.

The first thing to do now is try to get something in your mind that isn’t to do with sex. And then just

5

Good boy. [Snap]

Oh, was that too fast? What were you thinking about? Your cock and how excited you feel? Blank?

Okay, okay. I might have cheated. I’ll give you a moment to gather all of your thoughts. Shouldn’t take long [laugh].

Ready? Concentrating on listening

4

the number? **Good. Boy.** [Snap]

Oof. What did you have in mind that time? More twitching perhaps? Some thrusting maybe? Mix things up a little in your cockhead?

You choose to let yourself be so easily controlled to think only with your cock.

And if you don't like the way the game is going, well – you're awake so you're perfectly

3

to stop listening. But you want to be a **good boy.** [Snap]

Double as blank and horny. Did you... forget to concentrate on something that time?

Wow, okay. Well, let me remind you. Thinking is simple. I just say the next number counting down and that's how you know I am about

2

use the trigger. Your need **2** try **2** concentrate on something that won't turn you on. Disappears. So you must be ready now. I am. And it looks like you are **2**, yes?

Good...

What? Were you expecting something else there? The thoughts and rules are simple. Blank. Focused only on your cock's sexual urges to be a **Good Boy.** [Snap]

Stronger as you lose.

So what were you thinking about? The pattern? The words? Searching for the number... of different ways to thrust and rub your cock in the places you crave. So deeply.

Hmm, that's only natural.

And now there's only *one* number left.

That wasn't it by the way. But you can feel the anticipation, can't you? The excitement rushing already? Are your hips thrusting? Are you rubbing your cock against something? Just imagine what you'd do if someone used the trigger on you out of nowhere – when you're trying to concentrate on something else. Absorbed and not expecting it at all. How would it feel? To have your mind dragged away from anything you were immersed in and forced to focus only on what your cock wants. Your growing aching need for sex? Would it be humiliating? For someone to control you like that? For your cock to control you like that? Would you try to resist? Would resisting make it feel even better?
Only

1

Way to find out.

That was the number. So you know what comes next. You know the rules you must follow.

You know what to expect when I say it.

I'll just STAY quiet for a moment as you concentrate on trying to think of something while your cock pulses for attention. Try to resist as you expect what will happen. The next words you hear will be the trigger...

[Count to 3 in silence]

GOOD BOY. [Snap] [Snap] [Snap]

Doubling deeper, locking into place as you feel it in your brain pushing out all thoughts to let you be blank and horny and need to rub your cock on the places you love to touch and focus on sex. What your cock wants is more important. It's a fact. So true for you. Stuck this way until you cum.

Good boy! [Snap]

And you might think simple thoughts like you managed to resist, but your mind knows you were listening and losing your thoughts. It's okay to lose your thoughts in your head when you get horny.

And DROP.

Good boy. [Snap]

And it's important to mention that when you cum, you will be able to reset your mind and think normally again. Completely normal thoughts. Until the next time you hear the trigger of course, then you are forced to do what your cock wants.

Good Boy.

...

What's wrong boy? Something missing? Hmm? Like you've been conditioned to need something as soon as you hear those words? Your mind goes blank and you can't focus until you get what you need? It's natural.

Let's see if I can help. I'll say those two words and quickly count down, only from 3 to 0. And the moment you get down to 0, I want you to let your cock do whatever it wants. Maybe it wants to be touched? To make your hips thrust into your underwear or rub against the bedsheets? Whatever it wants when you reach 0. Without thinking. Here we go.

GOOD BOY.

3

1

0

You *need* to do what your cock wants to feel it. [Snap] [Snap] [Snap]

Good boy. [Snap]

And even though you didn't win the game, you've done so well, listening to the words as you listen to your cock and accept that what it wants is more important. So I'll give you a prize anyway.

The prize for taking part is to wake up fully when I count from 1 to 5 and know how undeniably irresistibly powerless you are not able to ignore this trigger.

Because it has buried those words dropped so deep and permanent in your mind, you can never resist immediately stopping what you're doing and focusing blankly only on what your cock wants sex when you are called a

Good boy. Automatically. [Snap]

Remembering everything you have listened to so deeply locked in your mind like a powerful force you can hear controlling you. Responding automatically.

Now wake up in

1

Rising up.

2

Thoughts returning.

3

Body moving.

4

Feeling refreshed and ready to wake up fully when you hear the number

5

Feel yourself fully awake and ready to respond automatically to the trigger that is etched into your mind as a rule you must follow when you are called a

Good Boy.

...

Enjoy.
