The Growth Lab Comic Series!

First of all, I need to thank you.

Thank you for checking out this comic and thank you for your support in ANY form. I would not be here today without my amazing friends and fans. I'm releasing these issues in the highest resolution format I have as a nod to all my longtime supporters who've helped and encouraged me. If you are familiar with my work you will know it's important to give back to the community.

If you are enjoying this comic and not already a supporter of mine, [check it out and see what you think](#). PERHAPS consider supporting my continued efforts to create art and animation for the community. I have a Patreon where I make movies and comics, a Gumroad store and of course a FREE main site if you want to check out my latest!

Your support and encouragement make this possible!

As I write this my Patreon has over TEN hours of transformation movies waiting for any new supporter. I don't gate any of my animation work so you get it all. I still do comics and one-off drawings too. Check out my [deviantArt](#), my [main site](#) and [my Patreon](#) or [Gumroad](#) if you want to see what I've been up to.

Thank you so much for your support of the Growth Lab Universe over the last twenty years! Here's to twenty more!

Second ship built of the Piccadilly Class starships.

Has been repaired many times since launch due to various growth calamities

Designed for deep space exploration, the Luxembourg can travel for seven years without resupply.

In emergency can be commanded by less than 16 people using computer assist

Can crew up to 60,000 people

Each of the five side 'windows' are actually many separate rooms spread across numerous decks.

Hull is held together through a combination of metal alloys and shield technology.

Large storage capacity for drive energy (the same energy that causes growth)

Powered by an experimental reactionless drive designed by Colette Marceau and Luna Masters

Standard crew size is approx 45,000

The Luxembourg has three main engine bays

From an Alternate Growth Lab Universe

Aria plays Luna Masters. She provides the mo-cap, voice and body scans for the Luna Holo character.

Unlike many other actors in this Universe, Aria looks nearly identical to Luna in ours.

Aria was previously an adult film star.

Can get dizzy and sick using VR or AR gear during film shoots.

Left Handed

In this Universe, Luna Masters has been played by three prior actors. Aria is the fourth and latest.

Height: 173cm (5'8")

Born: Sydney, Australia

Age: 22

Has three older brothers living in Perth

Has the least amount of social media followers of all the main cast (much to her annoyance)

Does not drive and takes the metro to work.

Uses American accent when portraying Luna

Fun Fact - Aria is an Olympic level archer with recurve bows

Aria Bloom

plays "Luna Masters"
Growth Lab Show
